Version with markings to show changes made pursuant to 37 C.F.R. § 1.121(c)(1)(ii):

IN THE CLAIMS:

-1. (Amended) A structured cosmetic composition comprising:

(a) at least one dyestuff; and

(b) at least one continuous liquid fatty phase,

wherein said at least one continuous liquid fatty phase is structured with a sufficient amount of at least one structuring polymer which has a weight-average molecular mass ranging up to 30,000 and which comprises:

a) a polymeric skeleton comprising repeating units comprising at least one hetero atom; and

b) at least one fatty chain, optionally functionalized, comprising from 12 to 120 carbon atoms, chosen from pendant fatty chains and terminal fatty chains which are bonded to said polymeric skeleton;

wherein said at least one fatty chain is present in a quantity ranging from 40% to 98% of the total number of all said repeating units comprising at least one hetero atom and all said at least one fatty chains;

wherein said structured composition is in the form of a wax-free solid, and wherein said at least one dyestuff, said at least one continuous liquid fatty phase and said at least one structuring polymer form a physiologically acceptable medium.

91. (Amended) A dermatological composition for at least one keratin material, a cosmetic care composition for at least one keratin material, a make-up composition, a body hygiene composition, a sunscreen composition for at least one keratin material, or an after-sun composition for at least one keratin material comprising a composition comprising:

- (a) at least one dyestuff; and
- (b) at least one continuous liquid fatty phase,

wherein said at least one continuous liquid fatty phase is structured with a sufficient amount of at least one structuring polymer which has a weight-average molecular mass ranging up to 30,000 and which comprises:

- a) a polymeric skeleton comprising repeating units comprising at least one hetero atom; and
- b) at least one fatty chain, optionally functionalized, comprising from 12 to 120 carbon atoms, chosen from pendant fatty chains and terminal fatty chains which are bonded to said polymeric skeleton;

wherein said at least one fatty chain is present in a quantity ranging from 40% to 98% of the total number of all said repeating units comprising at least one hetero atom and all said at least one fatty chains; and

wherein said composition is in the form of a structured, wax-free solid.

178. (Amended) A structured cosmetic composition comprising:

- (a) at least one dyestuff; and
- (b) at least one continuous liquid fatty phase,
